

REMARKS

Very thanks for Examination's suggestion and thanks for finding some citations about the present invention, thereby, the applicant may know more information about the invention. This case has been carefully reviewed and analyzed in view of the office action.

Examiner has kindly provides reference prior arts about the present invention, and thus the applicant has more information about the invention. All details of the reference prior arts are fully considered and compared with the present invention.

Indeed the citations disclose some features of the present invention, and the applicant agrees with these viewpoints, however applicant discovers that some features of the present invention are not wholly disclosed by the citations, which are claimed in the original specifications and especially drawings. Thereby, the applicant desires to get the patent rights of these features.

To overcome the rejection of the citations, applicant decides to cancel Claim 1, 3, 5, 6, 7, without prejudice or disclaimer of the subject matter thereof, and add new claims 8, 9, and 10. The original claims 2 and 4 are remained. Moreover, the claims 2 and 4 are now the independent claims of the present invention. The added new claim 8 adds same feature in the original claim 5, but now it is dependent to the claim 4. The added new claim 9 adds same feature in the original claim 6, but now it is dependent to the claim 4. The added new claim 10 adds same feature in the original claim 7, but now it is dependent to the claim 4. Thereby, it is assured that the new claims are based on the original claims and thus no new matter is added.

Applicant requests and authorizes Examiner to amend the claims of the present invention so that the claim and specification can match the requirement of U. S. Patent. Attentions of Examiner to this matter is greatly appreciated.

Since in above discussion, it is apparent that no prior art has the features of the present invention, especially in new claim 2. Furthermore, as we know that no other prior art has features of the present invention. Thus, the present invention is novel and inventive.

It is now believed that the subject Patent Application has been placed in condition for allowance, and such action is respectfully requested.

Respectfully submitted.
